Motivated Software Engineer with experience in software design, development, testing, and maintenance. Proficient in modern development frameworks and tools. I have hands-on experience in building scalable web applications and cross-platform mobile applications and effectively debugging complex software issues.

WORK EXPERIENCE

Software Engineer Xpert Digital - Developed scalable and secure mobile/web solutions for digital banking clients using Temenos Quantum Visualizer platform. - Collaborated with cross-functional teams including designers, QA engineers, and backend developers to deliver banking features aligned with client requirements and release timelines. - Optimized application performance and improved user experience by implementing reusable components, debugging production issues, and maintaining platform best practices.	Mar 2026 - Present Karachi, Pakistan
Software Engineer Lime Software Logics - Built responsive and pixel-perfect UI using React Native and React.js based on Figma and Adobe XD mockups for mobile and web applications. - Integrated REST APIs, handled data fetching, state management, caching, and implemented robust error handling. - Maintained and updated projects for international clients, fixed bugs, improved performance, and ensured smooth application functionality.	Oct 2025 - Jan 2026 Karachi, Pakistan
React Native Developer Mobitising Inc. - Develop and maintain the main product Koyal mobile application created using React Native, related to music and video content and streaming. - Ensure feature completion by performing timely debugging during the development of the mobile app. - Conducted research and development on different strategies to make the product more aligned with modern design principles and enhance the overall user experience.	Jan 2025 - Sep 2025 Karachi, Pakistan
React Native Developer Getweys Pvt Ltd - Developed fully responsive and adaptive React Native applications, for multiple clients to meet diverse client requirements across multiple screen sizes and platforms. - Ensured smooth and fluid UI/UX experiences by implementing best practices for layout, animations, and performance optimization. - Integrated RESTful APIs and third-party services to deliver interactive user experiences in various frontend modules.	Oct 2023 - Dec 2024 Karachi, Pakistan
React Native/React.js Developer GR-Tech - Developed and maintained cross-platform mobile applications using React Native, ensuring a responsive UI, smooth navigation, and optimized performance across Android and iOS, and worked on the front-end Admin Dashboard project for sports score project using React.JS. - Integrated REST APIs, implemented state management, and collaborated with the back-end team to deliver scalable, production-ready features. - I worked closely with designers and QA teams to refine the UI/UX, fix bugs, and improve the stability of mobile and web apps, resulting in a more polished user experience.	May 2022 - Jun 2023 Karachi, Pakistan
WordPress & React Native Developer KoderLabs - Started as a WordPress Developer, responsible for creating responsive website layouts, optimizing UI components, and improving overall user experience across multiple client projects. - Transitioned internally to React Native, contributing to mobile app development, implementing features, and integrating APIs to enhance product functionality. - Gained cross-domain experience by working in both web (WordPress) and mobile (React Native) teams, improving versatility, problem-solving skills, and ability to adapt to new technologies quickly.	Dec 2020 - Dec 2021 Karachi, Pakistan

SKILLS

Languages, Frameworks & third party tools: JavaScript (ECMAScript 6), TypeScript, React Native, ReactJS, Next.js, Node.js, Express.js, MongoDB

Version Control: Git, GitHub, BitBucket, GitLab

Third party APIs & libraries: React Native Elements, React Native Paper, Material UI, shadcn, Ant Design, TailwindCSS, Redux Toolkit, RTK Query, Context API.

EDUCATION

Bachelors in Computer Science (BSCS) University of Karachi	Feb 2014 - Oct 2018
--	----------------------------

PROJECTS

Ecommerce System 

Feb 2026 - Present

Developed a scalable RESTful backend for an e-commerce platform using the MERN stack. Implemented core features including user authentication, product and category management, order processing, and admin functionality. Integrated secure JWT-based auth, Role-based access control, and used MongoDB with Mongoose for database modeling. Also worked on integrating Stripe payment gateway for order payment processing.
